

Flower Pot

CONCEPT STATEMENT

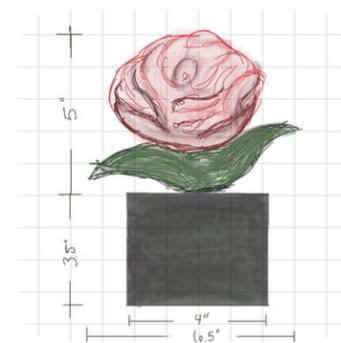

This luminaire is inspired by the organic shape of roses. The square dark wood grain base provides a balance to the feminine flower shape. Using pink and green as compliments creates a soft ambient light while changing the hues and tones of the Govee bulb gives the luminaries abstract lines depth because of its smart bulb capabilities which cast 800 lumens. This bulb was also selected because it uses 9 watts, just under the 10 watt average for LEDs. By providing a wide range of color outputs the luminaire can adapt to the users preference.
